

2010 Annual RCRA/DOT and OSHA Hazwoper Training

Annual RCRA/DOT Training

For the past eleven years, Rineco has been helping companies across the country stay in compliance with EPA and DOT regulations. Rineco's one day RCRA/DOT training course offers a great opportunity to meet both your RCRA 40 CFR 265.16 annual review requirements as well as the DOT recurrent training requirements found in 49 CFR 172.704.

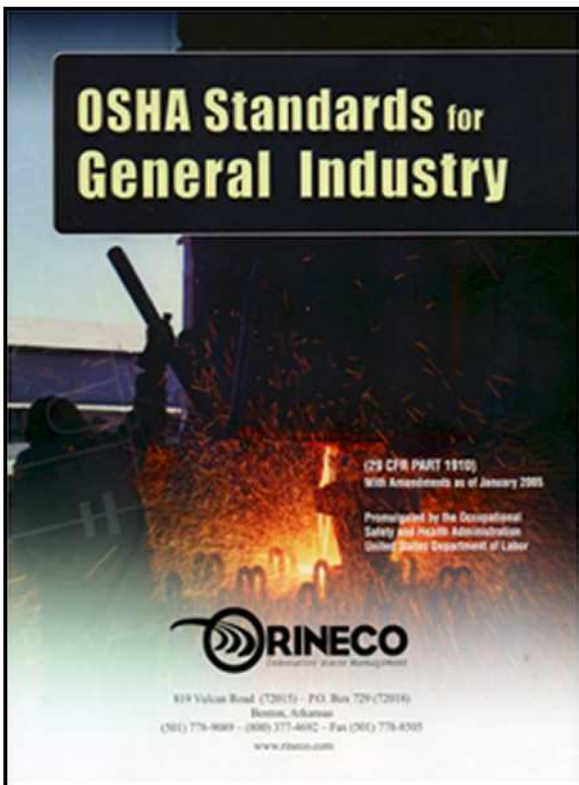

This class will review many of the important concepts and procedures that are required to stay in compliance with the regulations associated with hazardous waste and hazardous materials transport. We will cover many of the most common cited violations and give insight on new requirements that have been added in the recent year.

Course materials will include a copy of the presentation slides as well as the latest edition of the **Hazardous Materials, Substances & Waste Compliance Guide** which includes the **Emergency Response Guidebook**.

OSHA HAZWOPER Training

Whether you are new to the OSHA world or have dealt with OSHA regulations for many years, Rineco's OSHA HAZWOPER Refresher course is the perfect solution to get the training that you are needing. By completing the one day course, participants will receive an (8) Hour HAZWOPER Refresher Certificate suitable for framing.

This class will review OSHA's most cited general industry standards as well as a thorough HAZWOPER review. We will also cover such items as Workplace Safety, Inspections and Audits, Hazard Assessment, Personal Protective Equipment (PPE), Hazard Communication (HAZCOM), as well as several other common OSHA topics.
